

## PORTABLE ABRASIVE BLAST POTS

HOGG BLASTING AND FINISHING EQUIPMENT LTD

### Introduction :

Our portable blast machines have been improved and refined from years of feedback by leading contractors and industrial customers. The result is a range of rugged machines, which offer the features, and reliability users have demanded.

### Features :

- Low centre of gravity and four wheel design of the larger pots makes them ideally portable and stable for contracting or site work.
- Easy to load filling head
- large hand-hole located for easy access to allow internal inspection and maintenance
- Remote control deadman system with silencer for operator safety, water separator (for reduction in condensation problems), and abrasive metering valve.
- Safety Pressure Relief Valve
- Pneumatic remote control, enables the system to be de-activated in seconds from the nozzle, ensuring operator safety.
- Choice of Abrasive metering valve types to provides precise metering of all types of media
- Pop-up valve provides fast pressurization and quick abrasive loading.
- Available for sale or hire in sizes of 25 to 300 kg capacity to suit a wide variety of applications from stone cleaning, marine, civil, metal restoration, and building cleaning.
- Use of the machines can be tailored to the jobs requirements by the selection of different blasting nozzles and heads, and the use of the appropriate abrasive type media.
- HF Version has additional control features for delicate cleaning work
- High Pressure Versions available for increased production
- Fully CE marked
- A test certificate, operating and safety instructions are supplied with each machine.

SALES – SERVICE – HIRE - TRAINING

## PORTABLE ABRASIVE BLAST POTS

The machines can be supplied as a Bare pot or professional ready to use package complete with:

- Deadman's Handle
- 10 m Twin Remote Lines
- 10 m Blast Hose c/w fittings
- Silicone Carbide Nozzle
- Heavy Duty Gauntlets
- Breathing Air Filter
- CE marked Helmet c/w Belt and Regulator
- 10 m Helmet Airline
- 1 Inner and a pack of Outer Helmet Visors

The package can also be tailored to your individual requirements.

### Range :

Model 10 - the most compact pot in the range which can be put in the back of an estate car for easy transportation. Typically used for small jobs, touching up, or occasional blasting.

Model 14 - This model still offers a good easy transportation and maneuverability by one man, but holds 3 times the abrasive of the model 10.

Model 20 - a very popular pot with professional shot blasters. Ideal for medium to large projects and suitable for transportation in a small van.

Model 24 - our largest pot is ideal for large cleaning projects where downtime due to refill needs to be minimised.

Model HF - All the sizes of pots listed above can be supplied as an HF model. This has addition of a fine adjustment Abrasive Metering Valve and Pressure Regulator. This provides exact control of blast pressure and abrasive ideal for delicate work such as stone cleaning, timber / green oak, car bodies and other delicate work.

### Specification :

Model	10	14	20	24
Capacity	25 kg	75 kg	150 kg	300 kg
Approx time of continuous blasting	10	30	60	120
Size				
Height	0.77 m	1.05 m	1.15 m	1.38 m
Width	0.39 m	0.68 m	0.80 m	0.85 m
Depth	0.78 m	0.80 m	0.95 m	1.10 m
Weight without Abrasive	40 kg	70 kg	120 kg	190 kg
